

D4 2017 MOTION GRAPHICS

ORIJECT BRIEFS

WEBSITE

Create a live website showcasing your work.

- HTML5 / CSS3
- Hand-code the site
(comment in any code you borrow, and state source)
- W3C compliant
(as far as possible)
- Responsive for different devices
(use simplergrid, or similar)
- Live
(site must be working on a live server)
- Designed by you
(stating the obvious here, but don't just use a pre designed template)
- Use image slide shows/carousels/sliders from other sources
(leave the credits intact)

SHOWREEL

Create a 30 second showreel showcasing your design and motion graphic work.

- Use Premiere and After effects.
- Carefully select your work
- Take time with the editing and timing
- Any extra typography needs to be cleverly considered.

Use this Showreel in your website.
